ASSEMBLY

IMPORTANT: Both screws with anchors must be used to hang mirror.

1. Determine desired place to hang mirror (A).
2. Measure the distance from center of one keyhole to the center of a second keyhole on the back of mirror (A). Mark on the wall the location of each keyhole.
3. Using a drill bit the appropriate size for wall anchor (B), drill a hole at each marked location.
4. Carefully insert one anchor with screw (B) into each hole in wall.
5. Thread each screw into anchors. Do not completely tighten screws. Leave enough threads exposed on each screw so heads of screws will fit into keyholes on back of mirror (A).
6. Carefully hang mirror (A) onto screws.

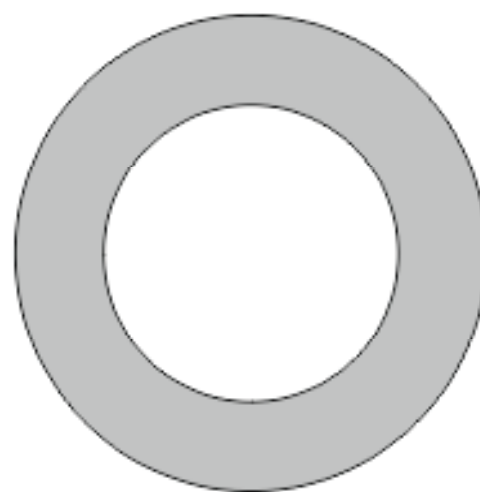

IMPORTANT: During the life of the product, periodically check all screws and fixings to ensure they are secure.
