

WARNING: DISCONNECT POWER AT THE MAIN FUSE BOX BEFORE INSTALLATION.

WARNING:

This fixture is intended for installation in accordance with the National Electrical Code (NEC) and all local code specifications. If you are not familiar with code requirements, installation by a certified electrician is recommended.

Before assembly, remove all parts and part packages from box. If anything is missing, please contact the retailer from which the product was purchased.

ITEM#: WL11377

1. Hold mounting bracket (A) so head of ground screw and tab on mounting bracket (A) is facing out. The two holes in the tab on the mounting bracket (A) should be at the top and bottom of the mounting bracket (A).
2. Carefully pull house wires through hole in center of mounting bracket (A).
3. Align holes in mounting bracket (A) with holes in junction box.
4. Thread each junction box screw (B) into holes in mounting bracket (A) and into holes in junction box. Tighten junction box screws (B) to secure mounting bracket (A) to junction box. **CAUTION:** Make sure house wires are pulled completely through hole in mounting bracket. **DO NOT** pinch wires between mounting bracket and wall.

5. Strip 3/4" of insulation from ends of fixture wires.
6. Slightly loosen ground screw on mounting bracket (A). Do not completely remove ground screw. Wrap house ground wire (copper) around ground screw, leaving enough ground wire to attach to fixture ground wire. Twist end of fixture ground wire and end of house ground wire together. Twist wire nut (C) onto ends of wires. Completely tighten wire nut (C). Reference chart below for correct wire connections.

Connect Supply (House) Ground Copper Wire to:

Bare Copper Wire or,

Bare Silver Wire or,

Green Insulated Wire.

7. Twist end of house lead wire (black) and end of fixture lead wire together. Twist wire nut (C) onto ends of wires. Completely tighten wire nut (C). Twist end of house neutral wire (white) and end of fixture neutral wire together. Twist wire nut (C) onto ends of wires. Completely tighten wire nut (C). Reference chart to the right for correct wire connections.
8. Wrap electrical tape (not included) around wire nuts (C) and wires. Ensure wires are securely fastened into wire nuts.
9. Carefully push all wires and wire nuts into junction box.

Connect Black Lead Supply (House) Wire to:	Connect White Neutral Supply (House) Wire to:
Black Wire or,	White Wire or,
*Parallel Cord (Round and Smooth) or,	*Parallel Cord (Square and Ridged) or,
No printed words on wire insulation or,	Printed words on wire insulation or,
Insulated Wire (other than green) with Copper Conductor.	Insulated Wire (other than green) with Silver Conductor.
*When parallel wire (SPT 1 & SPT 2) is used: The lead wire is round in shape or smooth. The neutral wire is square in shape or ridged.	

10. Place backplate (D) over mounting bracket (A). **CAUTION:** Do not pinch wires between backplate and wall.
11. Align holes in top and bottom of backplate (D) with holes in top and bottom of tab on mounting bracket (A). Thread one fixture mounting screw (E) into each hole in top and bottom of backplate (D) and into holes in tab on mounting bracket (A). Tighten fixture mounting screws (E) to secure fixture to wall.
12. Raise shade (K) up to fixture. Fit top edge of shade (K) over LED module. Carefully turn shade (K) clockwise to secure shade (K) in place. DO NOT over tighten shade. Repeat this step for remaining shades (K).
